**SCE'S APPLICATION FILING**

SCE's Application requests authority to revise retail rates for all of its customers, including how much of SCE's revenues will be collected from residential, commercial, large business, and agricultural customers. While this application will not increase or decrease overall revenues collected from SCE's customers, a number of other proceedings will conclude and result in changes to SCE's authorized revenues before the Commission finishes its review of this application. The rate design the Commission adopts in this proceeding will incorporate those revenue requirement changes. As part

of its proposed residential rate design changes, SCE is proposing to reduce baseline allowances, and establish separate baseline allowances for single-family and multi-family dwellings to promote a more equitable rate structure. SCE also requests approval of default or optional dynamic pricing rates for certain non-residential customers. These dynamic pricing rates or mandatory time-of-use rates will apply to many non-residential customers whose rates up until now have not been differentiated by the time period when electricity is used. These dynamic pricing rates were previously proposed in A.10-09-002 and are included in this application at the direction of the Commission.

The following table compares SCE's current average rates to the proposed increase (or decrease) in average rates if SCE's proposals in this application are approved by the Commission:

<b>Customer Group</b>	<b>Present Average Rates June 2011 ¢/kWh</b>	<b>Proposed Rates ¢/kWh</b>	<b>Proposed Change %</b>
Residential	15.6	16.0	2.3
Lighting – Small and Medium Power	15.0	14.6	-2.7
Large Power	10.8	10.7	-0.6
Agricultural and Pumping	11.9	11.9	0
Street and Area Lighting	18.0	18.3	2.0
Total	14.2	14.1	-0.1

The actual changes in rates will be determined by the CPUC.
