WSD-011 – Resolution implementing the requirements of Public Utilities Code Sections 8389(d)(1), (2) and (4) related to catastrophic wildfire caused by electrical corporations subject to the Commission’s regulatory authority

DATA REQUEST SET Cal Advocates - SCE - 2021 WMP - 01

To: Cal Advocates

Prepared by: Al Watson

Job Title: Sr. Manager Compliance and Training

Received Date: 1/15/2021

Response Date: 2/11/2021

Question 002:

For each publicly owned electric utility and electrical cooperative (collectively, POUs) to which you supply power, please respond to the following:

- a) Have you coordinated with the POU to ensure resilience of the POU during a public safety power shutoff (PSPS) event that you initiate? Please describe the nature of this coordination if so.
- b) In 2020, what coordination, planning, or other activities took place between you and the POU to mitigate the effect of a potential SCE-initiated PSPS event on the POU and its customers?

Response to Question 002:

- a) Yes. In 2019, SCE met with the POUs which could be impacted by an SCE event on our transmission and sub-transmission system. In these meetings, SCE reviewed the potential impact on the POUs if the circuits serving them were de-energized. SCE and the POUs also reviewed communication protocols in the event a line serving them was being monitored for PSPS or was de-energized. SCE also reviewed its WMP with the POUs.
- b) In 2020, SCE invited all POUs which could be impacted by PSPS to participate in SCE’s PSPS Working Groups and named the Southern California Public Power Authority to the PSPS Advisory Panel.
