

*Southern California Edison*

*WSD-011 – Resolution implementing the requirements of Public Utilities Code Sections 8389(d)(1), (2) and (4) related to catastrophic wildfire caused by electrical corporations subject to the Commission’s regulatory authority*

**DATA REQUEST SET T U R N - S C E - 0 0 6**

**To: TURN**

**Prepared by: Alejandro Komai**

**Job Title: Predictive Analytics/Data Science Advisor**

**Received Date: 3/12/2021**

**Response Date: 3/17/2021**

---

**Question 003:**

Please provide the amount of risk reduction (percent) from the deployment of these 4,000 miles of covered conductor and all other mitigations deployed on these miles. Please provide all supporting workpapers.

**Response to Question 003:**

See SCE’s response to TURN-SCE-006, Question 004 for the risk reduction based on covered conductor.

SCE deploys mitigations on circuits based on risk-informed programs. These can, but do not necessarily, target the same miles that covered conductor will target. SCE does not have the requested risk analysis related to other future mitigations deployed on those same circuit miles as covered conductor.
