DATA REQUEST SET Cal Advocates - SCE - 2023 WMP - 07

To: Cal Advocates
Prepared by: BILL KOTTEAKOS
Job Title: Senior Manager, Compliance
Received Date: 4/4/2023

Response Date: 4/7/2023

Question 13:

On p. 70 of OEIS' Final Decision approving SCE's 2022 WMP, OEIS states regarding SCE's Tree Risk Index [TRI] that "SCE should continue to explore quantitative ways to incorporate not only its TRI but its risk and predictive modeling into vegetation management and inspections to optimize prioritization, protocols, and schedules, among many other activities."4

- a) Has SCE followed the abovementioned OEIS recommendation?
- b) If the answer to part (a) is yes, please list and describe the ways that SCE has incorporated its TRI and risk and predictive modeling into vegetation management and inspections for the year 2023.
- c) If SCE has not incorporated its TRI and risk and predictive modeling into vegetation management and inspections for the year 2023, please explain why.

Response to Question 13:

- a. Yes, SCE has followed the recommendation.
- b. In 2023, SCE is building an open work predictive prioritization algorithm, which incorporates TRI as well as tree growth rate factors, to help to better identify, prioritize, and complete work orders and mitigate the associated risk. This will help SCE prioritize the completion of higher risk work first.
- c. Not applicable. SCE has incorporated its TRI and risk and predictive modeling into vegetation management and inspections for the year 2023.
