Response to Question 15:

Question 15 Table		
IWMS Area	Before Review and Revise Process (Circuit) Miles	After Review and Revise Process (Circuit) Miles
Severe Risk Area	3,293	3,255
High Consequence	4,026	4,492
Other HFRA	2,221	1,792

Note that the values above are based on a comparison between SCE's initial WRRM 7.1 output and the changes made through the review and revise process. Also, a 1.1 multiplier is applied to these mileages to reflect more spatially accurate values.
