

Southern California Edison
R.18-10-007 – SB 901

DATA REQUEST SET E P U C - S C E - 0 0 1

To: EPUC
Prepared by: Ryan Stevenson
Job Title: Senior Advisor
Received Date: 2/20/2019

Response Date: 2/25/2019

Question 1-14: Referring to your Company's presentation on February 13, 2019 in the SB 901 OIR workshop, slide 17:

- a. Please provide a breakdown of the 2019 capital cost estimates segregated into the three cost categories noted above (namely, distribution, transmission treated as distribution, and transmission subject to FERC jurisdiction).
- b. Please provide a breakdown of the 2019 O&M expenses for each of three categories referenced above.
- c. Please provide the same breakdown as requested above for expected capital costs for years subsequent to 2019.
- d. Please provide the same breakdown as requested above for expected O&M expenses for years subsequent to 2019.

Response to Question 1-14:

SCE objects to the question as irrelevant, overbroad, and unduly burdensome. The guidelines used to separate, for ratemaking purposes, assets and expenses between those subject to FERC jurisdiction and those subject to CPUC jurisdiction are not within the scope of this proceeding. This proceeding relates to the approval of SCE's 2019 Wildfire Mitigation Plan, and the programs and activities stated therein, not the cost recovery of and/or ratemaking associated with those programs and activities.
