January 2008

Have a Safe & Happy New Year

To properly remove and stow your holiday lighting and electrical accessories, please follow these safety tips:

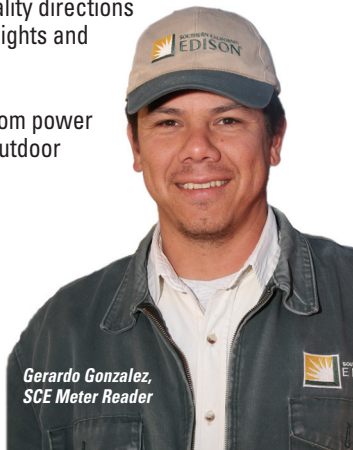

- Unplug electrical accessories before taking down decorations and lights.
- Unplug extension cords and decorations that are not in use – plugged in items still use electricity even when turned off.
- Don't tug on electrical cords – tugging may tear insulation and expose raw wires.
- Follow manufacturer and municipality directions for disposing of worn and broken lights and accessories.
- Leave at least 10 feet clearance from power lines when removing indoor and outdoor trees.

We look forward to serving you and wish you a Happy New Year. For more information about safety, please visit: www.sce.com/safety.
