Bishop Creek Hydroelectric Licensing (P-1394)

Matthew Woodhall
Southern California Edison Company
1515 Walnut Grove Avenue,
Rosemead, CA 91770

What is relicensing?

The Project currently operates under a FERC hydroelectric license that expires in June 2024. SCE must complete the relicensing process in order to obtain a new license to continue operation and maintenance of the Project. Relicensing is an open and collaborative process that provides agencies, Native American Tribes, non-governmental organizations, and members of the public an opportunity to participate in the development of new license conditions focused on the protection/enhancement of environmental, cultural, and recreation resources potentially affected by the Project.

How do I participate?

Members of the public will have many opportunities to participate throughout the relicensing process, starting at the very first public meeting. You can participate as often as you would like, ranging from attending public meetings, to actively participating in submitting comments on filed documents online. FERC appreciates the input of all stakeholders equally.

In particular, there are several resource interests that will be discussed during this process including:

- ◆ Recreation and Land Management
- ◆ Cultural, Historical and Archaeological
- ◆ Aquatic and Water Quality
- ◆ Terrestrial and Riparian
- ◆ Others

If you are interested in actively participating in this process, please visit www.sce.com/bishopcreek and fill out the Contact Registration Form.

Where can I learn more?

SCE has created a public website where you can access the following information:

- ◆ Project Description
- ◆ Relicensing Schedule
- ◆ Project Q&A
- ◆ Links to FERC's eLibrary and Docket Search
- ◆ Relicensing Documents
- ◆ Meeting Materials
- ◆ Important Dates
- ◆ Details on Technical Working Groups
- ◆ Licensing Flowcharts and
- ◆ Contact Information
