

Permanent Change in Operating Conditions Declaration

To Southern California Edison Company (SCE):

The undersigned customer has made permanent change in operating conditions which is anticipated to reduce demand on SCE’s electrical system and to result in the customer being eligible for another rate schedule. The customer has requested a change of rate schedule as provided by Section D.2 of SCE’s Rule 12, from Schedule _____ to Schedule _____ before completing the required 12 consecutive months of service at the new demand level, and hereby:

1. Declares that a permanent change in operating conditions has occurred for service located at

_____ identified by SCE as: Contract Account Number 700-_____ Contract Number 800-_____

2. Understands that:

- a. A permanent change in operating conditions is the result of permanent removal of electrical equipment or implementation of energy management measures acceptable to SCE at the customer’s premises. Demand on SCE’s electrical system must be reduced to a level which would otherwise qualify the account for a change of rate schedule provided the account would operate at the new demand level for 12 consecutive months.
- b. SCE has the right to inspect the customer’s premises and electrical equipment to determine if, in SCE’s opinion, a permanent change in operating conditions has occurred.
- c. SCE has the right to downsize its normal serving facilities to reflect the customer’s reduced level of demand, at customer’s expense if service has been for less than 36 months.
- d. For customers with such permanent changes, the effective date of the rate schedule change shall be the next regularly scheduled billing period following (1) the date of the written request to SCE for the change of rate schedule, (2) the date, verified by SCE of the permanent change in operating conditions, or (3) the date this Declaration is signed by both parties, whichever is later.
- e. If the above account’s demand level, in any month following the effective date of this change of rate schedule, exceeds the demand level limit of the new schedule, the account shall be changed back to the original schedule. The account will be rebilled by SCE as if there had been no change of rate schedule. The account is subject to this change until it would be otherwise eligible for a change of rate schedule.
- f. This Declaration in no way alters, replaces or supersedes the provisions of Rule 12.
