WSD-011 – Resolution implementing the requirements of Public Utilities Code Sections 8389(d)(1), (2) and (4) related to catastrophic wildfire caused by electrical corporations subject to the Commission’s regulatory authority

DATA REQUEST SET T U R N - S C E - 0 0 9

To: TURN

Prepared by: Peter Van Mieghem

Job Title: Senior Attorney

Received Date: 3/18/2021

Response Date: 3/23/2021

Question 004:

Regarding the risk curve relied on in SCE’s 2021 GRC:

- a. Does it “show that risk is not uniform and some segments exhibit significantly more wildfire risk than others”?
- b. Does it show “the risk associated with each circuit may not be uniform along its length”?

Response to Question 004:

SCE objects to this question on the following grounds: (1) the question seeks general rate case information that is outside the scope of this proceeding under Public Utilities Code Sections 8386 & 8386.4(b)(1); (2) the question seeks information not relevant to evaluation of SCE’s Wildfire Mitigation Plan; (3) the question seeks information not reasonably likely to lead to WMP comments that would be appropriate under Public Utilities Code Section 8386(d); and (4) there is no support for this question under Resolution WSD-001 or the “Wildfire Safety Division Guidance on Resolution WSD-001 and Data Request Best Practices” (January 29, 2021). Based on the foregoing, SCE does not intend to provide a substantive response to this question.
