DATA REQUEST SET Cal Advocates - SCE - 2023 WMP - 08

To: Cal Advocates
Prepared by: John Rankin
Job Title: Senior Manager
Received Date: 4/5/2023

Response Date: 4/17/2023

Question 11. e:

Referring to section 8.1.1.2 Targets, on p.237 of your WMP, SCE states that:

In Table 8-3 below, SCE provides the expected risk impact for each initiative at the scoping unit level and at the HFRA-level. As such, a given mitigation might appear to have a relatively smaller impact at the HFRA-level due to a limited scope of deployment, but a much larger impact at the segment or structure level. The risk impact percentages are in MARS and as discussed in Sections 6 and 7, SCE's IWMS Risk Framework takes into account additional factors not considered by MARS. SCE includes additional columns in the table below showing the percentage of an initiative's scope that is in Severe Risk Area (SRA) and High Consequence Areas (HCA).

e) Please provide a revised version of Table 8-3 that splits the “% in SRA/HCA” column into two columns (% in SRA; % in HCA).

Response to Question 11. e:

Please see the attached table.
