**DATA REQUEST SET CalAdvocates - SCE - 2022WMP - 07**

**To: Cal Advocates**  
**Prepared by: Patrick McConahay**  
**Job Title: Senior Advisor**  
**Received Date: 3/10/2022**

**Response Date: 3/15/2022**

---

**Question 12:**

SCE's response to data request CalAdvocates-SCE-2022WMP-05, Question 1, shows 9 open level 1 corrective notifications created in 2020 and 37 open level 1 corrective notifications created in 2021. In regards to this:

- a) Why hasn't SCE resolved these level 1 corrective notifications yet?
- b) What is SCE's timetable to resolve these level 1 corrective notifications?

**Response to Question 12:**

- A. For the (9) open Priority 1 notifications created in 2020 – all (9) of the notifications have been made safe in the field, with (3) of (9) now closed out. The remaining (6) notifications remain open pending paperwork close outs or customer-side repairs to be made prior to SCE completing the permanent repairs.

For the (37) open Priority 1 notifications created in 2021 – All (37) notifications have been made safe in the field. Overall, (24) of (37) notifications are now closed out, with the remaining (13) notifications pending final paperwork close outs or final construction of permanent repairs.

- B. Priority 1 notifications are worked immediately to ensure hazardous situations are made safe through temporary mitigations or permanent repairs. Construction delays, necessary customer interactions, and equipment procurement may delay permanent repair activities until constraints are removed.
