**Question 01 :**

Table 12 – Mitigation initiative financials

- a. SCE’s reported, territory-wide, projected cycle spend for 2020 is currently reported as \$5.9B (\$ 5,945,266,714.79) and is inconsistent with historical data on file. The latest historical data on file reports the following amounts for the same period: \$4.5B (includes initiative 7.1D) and \$4.3B (not including initiative 7.1D). Energy Safety requested data to reconcile the discrepancy in DR OEIS-SCE-22-002, Question 3. SCE answered Energy Safety and provided additional tables for review (“002-WSD-SCE-003\_20210309.xlsx” and “2020 WMP Non-WMP Activities\_Op Plan forecast.xlsx”). Providing the requested data in the most recent format would greatly help facilitate the resolution of this discrepancy; further, it would provide an easily understood historical record for future analysis:
- i. Please provide SCE’s projected cycle spend for the reporting period of 2020 in the most current format of Table 12.
