Washington, DC 20426

Subject: Lee Vining Hydroelectric Project (FERC Project No. 1388) Final License Application

Dear Secretary Reese:

Southern California Edison (SCE) hereby files with the Federal Energy Regulatory Commission (FERC) this Final License Application (FLA) for a new license for the relicensing of the Lee Vining Hydroelectric Project (Project) (FERC Project No. 1388). The Project is in Mono County, California, on both Lee Vining and Glacier Creeks. The current license issued by FERC on February 4, 1997, expires on January 31, 2027. All enclosed public documents will be available on SCE's Project website (<https://www.sce.com/leevining>) in addition to the FERC eLibrary.

SCE has prepared this FLA in accordance with the Traditional Licensing Process, as approved by FERC on October 8, 2021, and the application content requirements of the Code of Federal Regulations, Title 18, Section 4.51 (18 CFR § 4.51), *Application for License for Major Project—Existing Dam*. Included herein are final technical exhibits (Exhibit A, B, C, D, F, G, and H) and a final environmental report (Exhibit E). Please note that the draft Exhibit F (Design Drawings) and one-line diagram contain Controlled Unclassified Information (CUI) and Critical Energy Infrastructure Information (CEII). This information contains sensitive and detailed engineering information that, if used incorrectly, may compromise the safety of the Project and those responsible for its proper operation. These documents were filed electronically with FERC under the "CEII tab" and are marked as "CUI//CEII—Contains Critical Energy/Electric Infrastructure Information—DO NOT RELEASE" in accordance with instructions issued by FERC.¹ SCE requests that Exhibit F and the one-line diagram be maintained in a non-public file and withheld from public disclosure in accordance with applicable regulations.

This FLA discusses SCE's proposal for continued operation and maintenance of the Project. Exhibit E includes the results of studies undertaken in support of the relicensing. Discussion in Exhibit E considers how the information and data collected during the studies addresses issues raised by agencies and other interested parties, and how the information collected informs SCE's proposed Project operations. Exhibit E includes

¹ 18 CFR § 388.113

SCE’s proposals for protection, mitigation, and enhancement (PME) measures to address potential Project effects to environmental and social resources.

Due to weather and recreation facility closures in 2023, the Recreation Use Assessment (REC-1) survey was delayed and was ongoing as of the filing of the Draft License Application. The study has been completed and a Draft Technical Report was distributed to Stakeholders on January 20, 2025, for a 60-day review and is included with this filing. A REC-1 Final Technical Report will be filed later in 2025 following agency review. SCE does not anticipate any changes to the Proposed Action as a result of the REC-1 Final Technical Report’s findings.

The *TRI-1 Tribal Resource Final Technical Report* will be distributed to Tribes and the Inyo National Forest for a 60-day review in February 2025 and will be filed with FERC later in 2025 following comments received and addressed. The Historic Properties Management Plan (HPMP) is still in development, pending completion of the TRI-1 Final Technical Report. SCE plans to hold a HPMP meeting to review the draft HPMP with Tribes and the Inyo National Forests in 2025 and will be filed with FERC later in 2025 following comments received and addressed.

The FLA is being filed in five volumes as described below and includes the following exhibits describing Project resources:

- Volume I Initial Statement, Exhibit A, Exhibit B, Exhibit C, Exhibit D, Exhibit E, Exhibit G, Exhibit H (Public)
- Volume II Exhibit E Appendices, Consultation Log
- Volume III Final Technical Reports for completed study plans, REC-1 Draft Technical Report
- Volume IV Exhibit F, Single-Line Diagram (CUI//CEII—Contains Critical Energy/Electric Infrastructure Information—DO NOT RELEASE)
- Volume V CUL-1 Final Technical Reports (CUI//CEII/PRIV—Contains Confidential and Privileged Information—DO NOT RELEASE)

There are no portions of Exhibit E that reveal privileged, confidential cultural or Tribal resources information. Volume V of the FLA contains the *CUL-1 Built-Environment Final Technical Report* and *CUL-1 Archaeology Final Technical Report*, which contain information regarding sensitive cultural resources and therefore qualifies as confidential information under 36 CFR § 800.11(c)(1). Disclosure of such information could be harmful to these resources. Volume V was filed electronically with FERC under the “privileged tab” and is marked as “CUI//PRIV—Contains Confidential Information—DO NOT RELEASE” in accordance with instructions issued by FERC.² Because this information is

² 18 CFR § 388.112

Secretary Reese
 Page 3 of 3
 January 27, 2025

statutorily designated as confidential³ and exempt from public disclosure under the Freedom of Information Act,⁴ SCE requests that Volume V be maintained in a non-public file and withheld from public disclosure in accordance with applicable regulations. As stated above, the TRI-1 Final Technical Report and HPMP are still in development/under review and will be filed with FERC later in 2025.

Please direct any questions concerning the Project or process to Matthew Woodhall, Senior Relicensing Project Manager, by phone at (626) 302-9596 or via email at matthew.woodhall@sce.com.

We look forward to working with you toward the goal of a successful completion of the relicensing process.

Sincerely,

DocuSigned by:
